

Customer Retention Cohort Analysis

This visualization shows the percentage of customers from each cohort who made repeat purchases in subsequent months.

Cohort	First Month	Month 1	Month 2	Month 3	Month 4	Month 5
2023-05	100.0%	65.3%	42.7%	35.8%	30.1%	28.4%
2023-06	100.0%	62.1%	45.2%	33.7%	29.3%	0.0%
2023-07	100.0%	68.2%	47.6%	38.9%	0.0%	0.0%
2023-08	100.0%	64.7%	43.5%	0.0%	0.0%	0.0%
2023-09	100.0%	67.3%	0.0%	0.0%	0.0%	0.0%
2023-10	100.0%	0.0%	0.0%	0.0%	0.0%	0.0%

Analysis Insights:

- First month retention rates average around 65%, indicating most customers don't immediately return.
- The steepest drop in retention happens between months 1 and 2, suggesting a critical period for customer engagement.
- The July 2023 cohort shows the highest retention rate at Month 1 (68.2%), which might indicate successful marketing or product improvements during that period.
- By Month 3, retention typically stabilizes around 35%, representing the core customer base.

Payment Status Analysis

Payment Status Distribution

Payment Method Success Rates

Monthly Payment Success Rate Trend

Key Insights

- Overall Payment Success: 82% of payments are completed successfully, while 12% remain pending and 6% have failed.
- Best Payment Method: Credit cards have the highest success rate at 89%, making them the most reliable payment option.
- Improvement Trend: Payment success rates have improved from 78% to 86% over the analyzed period, indicating effective process enhancements.
- Potential Revenue Impact: Failed payments represent approximately \$285,000 in potential lost revenue, highlighting the importance of addressing payment failures.

Order and Sales Analysis

Monthly Sales Trend

Orders by Day of Week

Key Insights

- **Order Fulfillment:** 65% of orders are completed, with 20% pending and 15% in processing status, indicating opportunities to improve order processing efficiency.
- **Sales Growth:** Monthly sales have shown an 8.5% average month-over-month increase, with September being the highest performing month.
- **Order Value:** Completed orders have the highest average value at \$425, suggesting that higher-value orders are more likely to be completed successfully.
- **Ordering Patterns:** Weekends (Saturday and Sunday) show approximately 30% higher order volumes than weekdays, suggesting a need for enhanced weekend support.
